

EMS District AED In-Kind Contribution Documentation

Page __ of __

Each EMS District is asked to document at least \$6700 of in-kind contributions (\$3350 for EMSD #1 and #3) in support of these grant activities. This figure is not a "hard" dollar match, but rather reflects the expenditure of effort by EMS Districts and organizations receiving grant assistance. In-kind contributions can reflect the value of personnel time in meetings and training sessions (including FRECA courses, EMT courses, etc.) related to the grant activities. It can reflect time spent by organizations in researching models of AED for purchase. It can also include time spent by medical control physicians or trainers in providing program oversight or public education. Please use a figure of \$15 per hour for time spent by EMS personnel or the public. Use \$100 per hour for time spent by physicians. You may also include estimates of the value of contributed facilities for meetings or training sessions. The activities documented must have taken place between 9/1/2002 and 8/31/2003. Use additional sheets as needed. This form is due to the EMS office by November 4, 2003.

Description and date of activity:

Location and number of hours (if relevant):

Number of persons involved X \$/hour:

Value of contributed facilities claimed:

Total amount claimed for this activity:
